

Hello to all oyster growers,

**We collected
64 bushels of oysters
from our grower's docks in Whitehall,
Rideout, Meredith,
Mill and Burley Creeks.**

Overall we had a very good growth rate in almost all locations. However, some docks with shallow water suffered from the extreme cold over this past winter.

Thanks are due to our neighborhood Captains: Lana Keelty, Robbyn Veil, Brenda Biles, Nancy Inman, Carol Cowie, Mike Nathan, Rudy Polcak, Gail Higgenbotham, Tim LaValle and John Menoca for their help in notifying folks about the pickup routine.

We have a very good system worked out for both collecting juvenile oysters and resuppling spat in order to start the cycle all over. **We really could service many more docks. It pains us to go by so many docks that are “sterile”, that are not participating. PLEASE TALK TO YOUR NEIGHBORS ABOUT JOINING US.**

Many thanks to the volunteers and workers on our pickup boat. The photo shows them planting our oysters on the Severn River oyster reef. Shown in the picture are **Captain Brian Walton, Jose Garcia Rick Polcak, Paul Aubin and Don Carren.** Also, avid collectors of our oysters, but not in the picture are **Monty Schumpert and Marc Greenspan.**
